OFFICIAL CAPACITIES

THE STATE OF TEXAS

COUNTY OF JASPER

“My name is Paul Brister. I am a citizen of the United States, residing in the State of Texas, am over the age of eighteen (18), have never been convicted of a felony or crime involving moral turpitude, am of sound mind and am fully competent, in all respects to make this Affidavit. I have personal knowledge of all the facts stated herein, and same are true and correct.

"I am also one of the Custodian of Records for the City of Kirbyville Police Department. Attached hereto are 152 pages of records. These records are designated as Exhibits 'C1' – 'C15.' These said 152 pages of records are kept by the City of Kirbyville Police Department in the regular course of business, and it was the regular course of business of the City of Kirbyville Police Department for an employee or representative of the City of Kirbyville Police Department, with knowledge of the act, event, condition, or opinion, recorded to make the record or to transmit information thereof to be included in such record; and the record was made at, or near, the time or

reasonable soon thereafter. The records attached hereto are the original, or exact duplicates of the original, with the exception of the added Exhibit pages and the bates stamped number designations (Kirbyville 0000XX) in the lower right hand corner of each attached document. Also, Exhibit 'C10' does not include the voluminous exhibits that were attached and referenced within the Texas Ranger Report.

"Further, Affiant sayeth not."

Paul Brister - Affiant

SWORN TO AND SUBSCRIBED BEFORE ME on this the 4th day of August, 2016, to certify which witness my hand and seal of office.

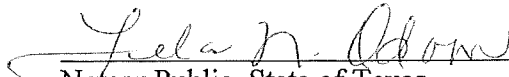

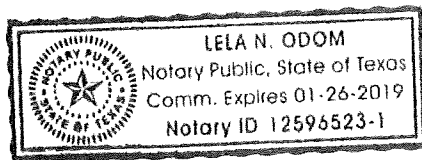

Notary Public, State of Texas

EXHIBIT "C-1"

AFFIDAVIT

STATE OF TEXAS COUNTY OF JASPER

Before me, the undersigned authority in and for the State of Texas, on this day personally appeared, Josh Hancock, who, after being by me duly sworn, deposes and said:

My name is Josh Hancock. I am of sound mind, over 18 years of age, and competent to give this affidavit.

1. I, Deputy Josh Hancock, am a certified Peace Officer in and for the State of Texas. I am employed by Kirbyville Police Department, in the County of Jasper, State of Texas, and was so employed at the time of this investigation. The bases for my belief and knowledge are as follows:
2. On or about 02-14-2013 at approx. 0850 hrs this officer received a call via dispatch in reference to a wanted subject out of Jefferson County. Dispatch advised Dustin Keith Jones was seen at the residence of Arthur Breed on Chestnut St. off MLK. Jones was stated to be in the yard of the residence walking around without a shirt on. Caller advised dispatch that Jones was stated to have been using drugs at the residence and was still there at this time. Dispatch advised that Jones was wanted for Aggravated assault, Aggravated Robbery, and Sexual Assault of a Child. Dispatch advised they spoke with Jefferson County and the Warrants were confirmed.
3. Due to the nature of the warrants this officer contacted Chief Paul Brister to assist in the apprehension of Jones.
4. While in route to the residence dispatch advised this officer that Jones was still at the residence and that he was known to carry a gun. This officer advised Chief Brister of the information.
5. At approx. 0902 hrs. this officer and Chief Brister arrived at the residence of Arthur Breed on Chestnut St. At this time this officer and Chief Brister made contact with Breed who was standing in the yard. Upon being asked who was at the residence, Breed stated his daughter was. This officer asked Breed if there was anyone else in the residence at which time he stated her husband (Jones) was also. This officer asked Breed what her husbands name was at which time, Breed advised Dustin.
6. This officer and Chief Brister approached the door of the residence that the suspect was stated to be in. This officer called out "Dustin" and a voice from inside the residence stated "Yah." This officer advised the suspect (Jones) to come out of the residence and speak with officers. The suspect complied and walked outside. Upon being asked what his name was, the suspect stated Dustin Jones.
7. This officer asked Jones to place his hands on the side of the trailer home at which time he complied. Upon performing a pat search for weapons this officer asked Jones if he had any weapons on his person at which time Jones stated that he had a knife in his pocket. At

this time Jones was advised that he had warrants for his arrest out of Jefferson County and that he was going to be placed under arrest.

8. Upon attempting to place handcuffs on Jones he turned and struck this officer in the chest knocking this officer into Chief Brister. Upon losing control of Jones, Jones ran towards MLK and this officer began pursuit.
9. This officer attempted to deploy the Taser on Jones at which time it failed to fire. Upon getting the Taser to deploy, the shot missed Jones and the foot pursuit continued.
10. This officer pursued Jones South on MLK to Henry Robinson St. and East on Henry Robinson St. This officer was able to bring Jones to the ground and end the foot pursuit in the yard of the church on Henry Robinson St.
11. Upon struggling with Jones on the ground, this officer realized that my handcuffs and Taser had been lost in the pursuit. This officer attempted to call for help on the radio at which time Jones stripped the radio from this officer's hand and threw it across the yard. A fight continued with Jones at which time Jones was able to get on top of this officer, pinning this officer to the ground. This officer's ability to breathe became restricted, and this officer was close to losing consciousness.
12. Chief Brister at this time arrived to assist this officer. Chief Brister attempted to get Jones off this officer by striking him in about the head and shoulders area with an SL20 flashlight. The attempt was not effective in getting Jones off of this officer. This officer advised Chief Brister that Jones being on top of this officer was restricting this officer's breathing to "Get him off of me". Chief Brister then performed a hold on Jones and rolled him off of this officer.
13. Chief Brister was able to lock his legs around Jones holding him to the ground where this officer was able to get on top of them and hold Jones's arms due to the fact Jones was still trying to fight.
14. To our knowledge other officers were in route to our location to assist with the apprehension of Jones, at which time this officer and Chief Brister continued to hold Jones on the ground with what strength we had left, until the other officers arrived.
15. While on the ground Chief Brister stated that he was having trouble breathing due to the weight of Jones and me on top of him, that "they need to get here."
16. A woman standing behind us, later identified as Krissy Adams, called out to us and asked if we needed help. This officer advised Mrs. Adams to call 911 and let them know where we were located and to get the bag in the rear of my patrol vehicle where a set of handcuffs were located. At this time this officer observed that Jones was not breathing and advised Chief Brister.
17. Chief Brister released his hold on Jones and we handcuffed him. This officer rolled Jones onto his back and checked for a heart beat. This officer was unable to detect a heart beat from Jones at which time this officer began chest compressions. Krissy Adams stated that she was a nurse and provided assistance with CPR. Chief Brister called dispatch at this time and requested an ambulance to our location for Jones.

18. Upon arrival of back up units and EMS they took over CPR and medical treatment of Jones.

I have read the above statement, which is based on my personal knowledge, and is true and correct.

AFFIDAVIT

STATE OF TEXAS COUNTY OF JASPER

Before me, the undersigned authority in and for the State of Texas, on this day personally appeared, Paul Brister, who, after being by me duly sworn, deposes and said:

My name is Paul Brister. I am of sound mind, over 18 years of age, and competent to give this affidavit.

1. On Tuesday May 14th 2013 at approximately 8:50 AM, I, Paul Brister Chief of Police for the Kirbyville Police Department, received a phone call from Kirbyville PD Officer Josh Hancock in reference to warrant service.
2. Officer Hancock stated that the Jasper Sheriffs Office dispatch had called him and said that the Jeff. Co. Sheriffs Office had sent 3 Felony Arrest Warrants for suspect Dustin Keith Jones. Two probation violations, 1 for Aggravated Assault and the other for Aggravated Robbery, and one for Sexual Assault of a Child.
3. The dispatcher said that the suspect Jones was at a residence on MLK, being the residence of Arthur Breed, and further stated that Jones always carried a gun.
4. Officer Hancock and I proceeded to the residence and as we drove into the driveway at approximately 9:04 AM we saw Mr. Breed sitting outside. We approached Mr. Breed, and Officer Hancock asked him if anyone was in the residence. Mr. Breed said his daughter was and when asked who else, Mr. Breed said her husband (Jones). Officer Hancock asked his name and Mr. Breed stated Dustin.
5. We approached the door of the residence and Officer Hancock called Jones name and asked him to come outside and speak with us. Jones complied and walked out, and Officer Hancock asked Jones to place his hands on the side of the residence to perform a pat down for weapons. Jones again complied.
6. As Officer Hancock began his pat down, Officer Hancock advised Jones that he had warrants out of Jefferson County.
7. At this time Jones turned and hit Officer Hancock in the chest, knocking Officer Hancock backwards into myself.
8. Jones ran onto MLK and we both pursued on foot.
9. Officer Hancock drew his Taser and fired but missed Jones, and the foot pursuit continued.
10. I ran back to the residence and got in the Kirbyville PD marked patrol unit and followed. I found the two of them on Henry Robinson Street, both lying on the ground.
11. I saw Officer Hancock on the ground on his back with Jones on top of him.

12. I had my duty weapon, Glock Model 23 .40 caliber pistol, but because of the close proximity between Officer Hancock and Jones straddled over the top of him, I was in fear that discharging my pistol at Jones could also cause injury to Officer Hancock. I retrieved a SL-20 flashlight from the patrol unit, and ran over to assist Officer Hancock.
13. As I was going over to assist Officer Hancock, Jones was still on top of him. Officer Hancock was saying with labored breathe, I can't breath, get him off of me. Officer Hancock was short of breathe, his face was pale, and his eyes had that faraway "oh shit" I'm in a bind look. Recognizing that Officer Hancock was in immediate imminent danger of serious bodily injury or death and not knowing if Officer Hancock had already been injured by Jones (possibly shot or stabbed), I struck Jones about the head and shoulders with the SL20 flashlight in an attempt to get Jones off of Officer Hancock.
14. As this measure rendered no relief to Officer Hancock, and seeing he was still in trouble. I threw the flashlight out of reach, and I got Jones in a headlock and rolled him off of Officer Hancock and at the same time was able to wrap my legs around him and lock my boots together.
15. Officer Hancock got up and got on top of us both and held Jones hands as Jones was still trying to fight.
16. Officer Hancock and I only had enough energy to hold Jones in this position until back up officers that we knew were on the way, arrived.
17. It is unknown to me how long we were down on the ground holding Jones, but I was completely out of energy, and remember telling Officer Hancock that back up needed to get here because I was get to the point where I was out of breathe.
18. Shortly afterwards Officer Hancock stated "Paul I don't think he's breathing." I then released my hold, and we rolled Jones onto his stomach, restrained him, and then rolled him back onto his back. Officer Hancock and a Good Samaritan neighbor began CPR.
19. I at this time used my cell phone and called Jasper Co. S.O. 911 and requested an ambulance.
20. At this time other Officers arrived and took over CPR.

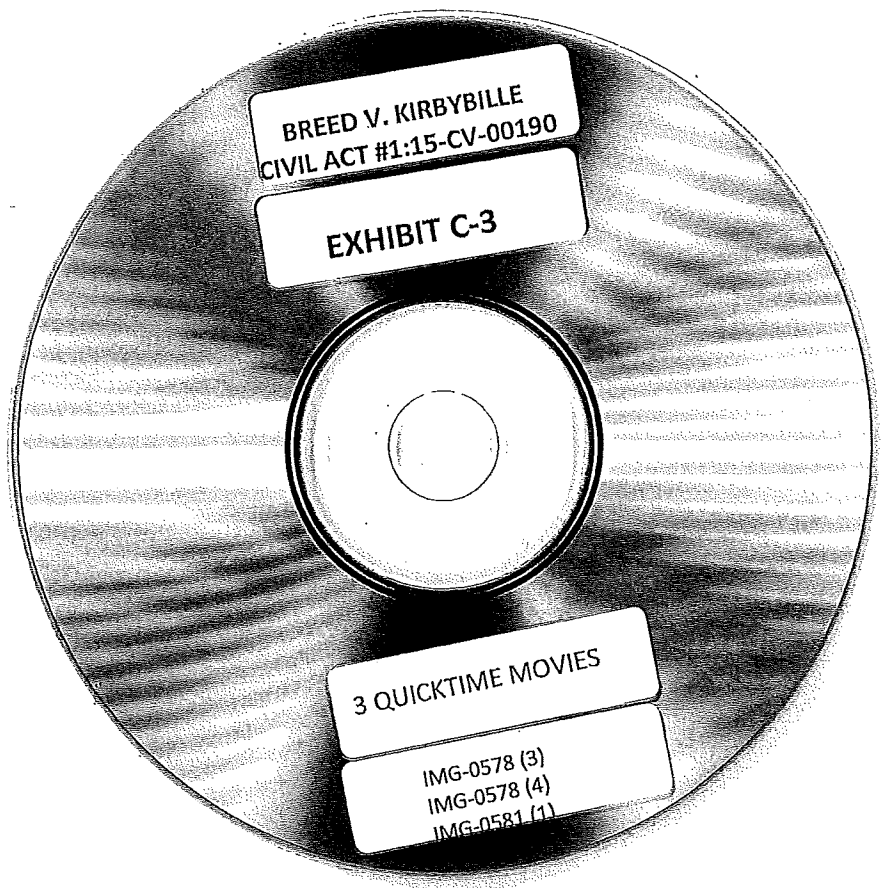

I have read the above statement, which is based on my personal knowledge, and is true and correct.

WITNESS STATEMENT

THE STATE OF TEXAS §

COUNTY OF HARRIS §

DATE: 05/17/2013

TIME: 11:10 AM

BEFORE ME, the undersigned authority, in and for the State of Texas, on this day personally appeared, KRISSY THOMAS-ADAMS, DOB [REDACTED], residing at [REDACTED] TOMBALL, TEXAS 77377, who, after being by me duly sworn, deposes and states:

I Krissy Thomas-Adams on the date of May 14, 2013 was in Kirbyville visiting my mother Joan Rawls with my daughter Kacye Adams. I heard my mother call out to me to come see that someone was fighting. I ran to the driveway and noticed there were three people in a struggle. I was not able to make out who they were. I noticed the younger officer hitting someone with the club as the other guy was swinging at him. I did at this point notice that one of them was an officer of the law because of the waste belt that he was wearing. When I noticed this I started to video tape the scene. While I was videoing the scene I saw that someone that was under the crowd had stop kicking. It appeared that the guy was fighting two of the officers I ran over and ask them if they needed backup, while I heard the officer asking him "do you give up!" The younger officer was on top of the pile and stated "YES!!" I proceeded to dial 911 to dispatch for help. While trying to speak to 911 the officer started screaming "send someone fast, because they don't know where we are". I then laid my phone on the ground and allowed the 911 and the officer to talk. While doing this I informed the officer that the suspect was not moving and not breathing. He asked me to get his belt out of the left front seat to help him secure the suspect. I went to the vehicle but I was not sure what it looked like. He then asked me to grape his brown backpack that was in the back, so I did. He proceeded to secure the suspect while the other officer seems in a lot of distress moved away from the scene to catch his breath. I then told him that I can assist with CPR I am a nursing

TEXAS DEPARTMENT OF PUBLIC SAFETY
TEXAS RANGER DIVISION
WITNESS STATEMENT

student UTA. He asked me to look in his truck by the little black box on the right and grab the mask and ambu bag. I return to the officer and open the bag and place the mouthpiece on the suspect and began to administer CPR. After a while we switched places to where I was doing the compressions and he was bagging. The other officer was taken water by my daughter to help calm him down. It was a few minutes before other officers had shown up to relieve me. After this there became a crowd of people and commits and such took place.

I have been explained the meaning of Perjury and Aggravated Perjury. I understand the meaning of Perjury and Aggravated Perjury as explained to me.

This statement is true and correct and I am giving it to Texas Ranger

JEFF OWLES.

I have read this statement consisting of 2 page(s), and I do affirm that all the facts and statements contained herein are true and correct.

Kristy Ann May
(witness)

Subscribed and sworn to before me, JEFF OWLES, a peace officer of the State of Texas and pursuant to §602.002 Texas Government Code, on this the 17 day of MAY, A.D. 2013

EMERGENCY PHYSICIAN RECORD
• Cardiopulmonary Resuscitation •

DATE: 5/14/13 TIME SEEN: 10:00 ☒ Arrived by EMS
HISTORIAN: patient spouse paramedics
Specific history elements taken from historian:
HX / EXAM LIMITED BY:
TRANSFER FROM: ☐ see transfer record
TREATMENT PTA: by patient paramedics

last nitro O₂ albuterol tx aspirin dextro cardioversion
epix atropine x vasopressin amiodarone IV/IO

HPI

Initial complaint(s): collapsed found unresponsive
chest pain dyspnea abdominal pain back pain

onset/duration: min / hrs / days ago
down time before ACLS: minutes unknown

Timing: still present improved
Intermittent episodes lasting occurred times
Nature of spontaneous circulation at scene in toilet

*context:
(the specific about what patient was doing when complaint occurred)
arrest witnessed: bystander CPR

Initial findings: by paramedics
mentation: responsive pulse: none rhythm: asystole
unresponsive: none weak VPM: weak
tearful: none strong PEA: tachy / brady
alert: normal strong sinus

HR: BP: Glucose: ref / 0

Associated symptoms:
nausea / vomiting palpitations pt. began
sweating cough blood / sputum checked
shortness of breath weakness / dizziness prior to
collapse

ROS

CONST - recent illness / fever GI - abdominal pain
EYE - problems with vision MS - joint pain
ENT - sore throat SKIN - rash
CVS - chest pain LYMPH - edema swelling
GU - problems urinating PSYCH - anxiety / depression
LUNG - preg. post-monop
☐ except as marked positive, all systems above reviewed and found negative

PAST HX no chronic diseases
cardiac disease AHA CAD CHF MI hypertension
diabetes Type 1 Type 2 CVA/TIA deficit
diet / oral / insulin
old records reviewed / summary:

Medications: none med list reviewed
did not bring / cannot name
aspirin within 24 hrs coumadin clopidogrel
Allergies: NKDA
see nurses note

SOCIAL HX smoker: ppd / past / quit days / mos / yrs ago
smoking cessation counseling provided time spent
discussed plan / triggers / challenges / risk / Re plan
counseling tools distributed and completed
completed Nicotine Dependence Assessment
drugs: alcohol (recent / heavy / occasional)
occupation: living situation alone family friend group care facility

FAMILY HX negative

☐ Visual Reviewed Abnormal Notes: 8/8/98 HR 92 RR 24 Temp 98.2
☐ Nursing Assessment Reviewed

INITIAL PHYSICAL EXAM

See reverse for initial rhythm and interventions

CONSTITUTIONAL unresponsive
no evidence of trauma
RESPIRATORY
breath sounds: no spontaneous respirations
equal bilaterally bag-valve-mask
lungs clear: equal bilaterally
decreased air movement
wheezes / rales / rhonchi
no spontaneous pulse
chest compressions
pulse w/ OPR: none poor beat
heart sounds: absent
irregularly irregular rhythm
extrasystoles (occasional / frequent)
JVD present
murmur: grade 1/6 sys / dia
gallop (S3 / S4)
distention
hepatomegaly / splenomegaly
mass
guarding
catheter present
head trauma
c-spine tenderness
tracheal deviation
unresponsive / agitated / confused

ABDOMEN / GU
soft no mass

HEAD / NECK
trauma
pharynx clear
NEURO
pupils: reactive
CN's: nml (2-10)
pupils: equal
size: R 5 mm L 5 mm
no motor response
abnormal response to pain
withdraws flexion extension
Babinski reflex (R / L)
reflexes: absent
rigidity
pedal edema (R / L)
pallor
cyanosis
dependent lividity
pressure ulcer location

EXTREMITIES
no signs of trauma
SKIN
rash
infect

RELAXER

ERTS

INITIAL RHYTHM

asystole
V. Fib
V. Tach
A. Fib

Normal rhythm
ECG: brady
rate: _____

heart block 1° 2° 3°

PROCEDURES & INTERVENTIONS

Initial of provider performing procedure.

CPR

initiated by: ED physician
with H ET tube curved / straight blade nasal / oral

ECG: asystole asystole asystole asystole

Post-intubation breath sounds equal

Pulse On: _____ End tidal CO2: good color change

central line placed needle technique: lidocaine prep
right / left internal jugular subclavian femoral
ultrasound guidance

pacemaker external / transvenous

defibrillated x _____ cardioverted

epinephrine 0.5 mg amiodarone _____ mg
vasopressin _____ mg sodium bicarb _____ amps
atropine _____ mg lidocaine _____ mg

NG tube / Foley catheter

Epi / atropine
Vib x 2. 3 diff. bubble
9 SRO C

A-BP w. norepinephrine started

A was in head lock when
he collapsed

ET-tube advanced 3cm

not to have bleeding
from mouth, nose
inspiration side
in 10 min - DIC

FPP order
spoke with Dr. Ahmad states
will not accept as direct admit

EKG & X-RAYS

ERG N/A Reviewed at _____ (time) Rule _____
NSR nml intervals nml axis nml QRS nml ST/T wave

not / changed from: _____ repeat EKG: unchanged /

CXR Intep. by _____ radiologist Visualized by me _____
nml / NAD no infiltrates nml heart size nml mediastinum

Date	Time	1416	1040	Reference	Units
Protline			12.7 HI	9.0-10.9	secs
Protline	2 CFP TX		1.3 (a)	*	Ratio
INR			120.0 (b) CH	25.0-35.0	secs
PTT			> 8000 (d) HI	< 600	ng/mL
D-dimer Quant					

NOTES: (a)

*INR values, while recommended for monitoring all stages of oral anticoagulant therapy, may be less reliable during the initiation period of treatment.

INR THERAPEUTIC RANGE:

Conventional Dose = 2.0 - 3.0

Intensive Dose = 2.5 - 3.5

- (b) Critical value, verified by repeat analysis or trending.

Called to MARY ANN/ER

at 1207 on 05/14/13 by SHE00209.

Result read-back successful. Y

See also (c)

- (c) Although heparin therapy should be individualized, a range of 1.5 to 2.5 times the patient's baseline APTT serves as a guideline.

- (d) A D-dimer result in the upper quintile (greater than 600 ng/mL with the Biosite assay) is associated with a significantly increased risk for thromboembolism, DIC, or other coagulopathy. Correlation with the clinical and radiographic data is suggested.

Albumin			3.2	L			3.5-5.0 g/dL
Globulin			3.5				g/dL

NOTES: (1)

ESTIMATED GFR REFERENCE RANGES ARE FOR THE "NORMAL POPULATION" 5th - 95th PERCENTILES.*

The MDRD equation used to estimate the GFR has only been validated for patients 18 to 70 years of age, and assumes a body surface area of 1.73 square meters.
To estimate the GFR for African Americans, multiply the result provided by 1.21.

Stages of Patients with Known Kidney Disease	GFR (ml/min/1.73 sq.meters)
Stage 1 - Kidney damage w/normal or increased GFR	90 mL/min or greater
Stage 2 - Kidney disease w/mildly decreased GFR	60-89 mL/min
Stage 3 - Moderately decreased GFR	30-59 mL/min
Stage 4 - Severely decreased GFR	15-29 mL/min
Stage 5 - Kidney failure	14 mL/min or less

POST TRANSFUSION Total Volume (NFUSED): ml

POST TRANSFUSION ASSESSMENT (Notify physician of change in pre- to post-assessment status).

LUNGS: | clear | | crackles X wheezes **SKIN:** Hives/rash | | yes | X no **URINARY OUTPUT** > 30 cc/hr: | | yes | X no

Transfusion filter changed: | | yes | | no

Possible Transfusion Reaction CRITERIA:

1) Change in body temperature (rise of at least 1°C or 2°F)	3) Chills (shaking) with or without fever
2) Pain at infusion site, in chest, lower back, abdomen or thighs, or headache	4) Blood pressure changes
5) Change of Respiratory status (i.e. hypertension related to volume overload, shortness of breath, etc.)	6) Skin changes (flushing, urticaria, edema (local or general)
7) Nausea (with or without vomiting)	8) Anaphylaxis
9) Acute onset of sepsis (fever, severe chills, hypotension, high output, cardiac failure)	
10) Any adverse symptom or physical sign occurring during transfusion of blood components should be initially considered as a potential acute transfusion reaction.	

BLOOD REACTION: | | yes | X no

(If yes, proceed and follow Blood Transfusion Reaction Worksheet - page 1.)

- 1) Stop the transfusion IMMEDIATELY.
- 2) Leave catheter in vein, change IV tubing and slowly infuse 0.9% saline.
- 3) Notify the physician IMMEDIATELY.
- 4) Continue completing Blood Transfusion Reaction Worksheet - p. 1)

POST MORTEM WORKSHEET

Patient's Name Jones, Dustin Age 26 Sex M
Home Address: 2475 1st St. Beaumont, TX 77703
Social Security Number: [REDACTED] Birthdate 8-31-1986
Date of Admission 05-14-2013 Date/Time Pronounced 5/15/2013 @ 1705
Pronounced By: Dr. H. Bencomitz Admitting Physician Dr. H. Bencomitz (not resident)
Call Southwest Transplant Alliance (STA) on ALL deaths to discuss possibility for donation 1-800-201-0527.
Donor Referral Line (STA) will contact eye & tissue banks for you.

☒ The patient is a candidate for organ donation. (STA will coordinate consent process.)
☒ The patient is not a candidate for organ donation but is possibly a candidate for eye/tissue donation.
Reason for decline: Organ failure Name of Coordinator: Sam

Eye/Tissue Bank Response:
☒ The eye and tissue banks have stated that this patient is not a candidate for eye or tissue donation.

DO NOT APPROACH THE FAMILY.
Reason for eye/tissue bank decline: Multi-organ failure
Name of eye/tissue bank coordinator(s): Sam

The patient is a candidate for:

☐ Eye donation ☐ Tissue donation Name of eye/tissue bank contact: _____

The tissue/eye bank will coordinate consent with nursing staff.

(If the person authorized to make decisions about donation consents to donation, complete the STA Consent Form.)

Name/Title of person completing this form: Tammy Abney, RN Date/Time: 5/15/2013 @ 1705

Report #
RAD 0515-0468

Requisition #
13-0089367

Exam CPT: 71010

Chest one view May 15, 2013

Clinical history: Cardiac arrest.

Comparison: Chest one view May 15, 2013 at 02:31 a.m..

Findings:

Endotracheal tube tip projects approximately 3.1 cm from the carina. Nasogastric tube is stable in position. Previous right internal jugular central venous catheter is not definitively visualized on this exam. A right upper extremity PICC catheter tip projects over the expected right atrium.

No new pulmonary or pleural abnormality detected.

The remainder of the examination is not significantly changed.

Emergent Interpretation

Nuclear medicine brain vascular flow study with SPECT imaging

History: Brain death. Cardiac arrest. Unresponsive.

Technique: 25.0 mCi technetium 99m labeled Ceretec were administered.

Findings: There is lack of intracranial vascular flow, consistent with a brain death.

Impression:

1.. Brain death.

Exam CPT: 71010

Chest one view May 15, 2013

Clinical history: Cardiac arrest.

Comparison: Chest one view May 15, 2013 at 02:31 a.m..

Findings:

Endotracheal tube tip projects approximately 3.1 cm from the carina. Nasogastric tube is stable in position. Previous right internal jugular central venous catheter is not definitively visualized on this exam. A right upper extremity PICC catheter tip projects over the expected right atrium.

No new pulmonary or pleural abnormality detected.

The remainder of the examination is not significantly changed.

Emergent Interpretation

Nuclear medicine brain vascular flow study with SPECT imaging

History: Brain death. Cardiac arrest. Unresponsive.

Technique: 25.0 mCi technetium 99m labeled Ceretec were administered.

Findings: There is lack of intracranial vascular flow, consistent with a brain death.

Impression:

1.. Brain death.

Exam CPT: 71010

Chest one-view 1739 hours

History: Status post cardiac arrest, check central line placement.

Findings:

Right internal jugular central venous catheter tip overlies the expected cavoatrial junction.

ET tube tip is well above the carina.

NG tube tip courses below the GE junction and projects over the expected gastric fundus.

There is no focal lung consolidation, pleural effusion or pneumothorax.

> BUN	18		6-20 mg/dL	
> Creatinine	3.0	N	0.9-1.5 mg/dL	
> Est GFR	27	L	90-142	

ESTIMATED GFR REFERENCE RANGES ARE FOR THE "NORMAL POPULATION" 5th - 95th PERCENTILES.*

The MDRD equation used to estimate the GFR has only been validated for patients 18 to 70 years of age, and assumes a body surface area of 1.73 square meters. To estimate the GFR for African Americans, multiply the result provided by 1.21.

Stages of Patients with Known Kidney Disease	GFR (ml/min/1.73 sq.meters)
Stage 1 - Kidney damage w/normal or increased GFR	90 mL/min or greater
Stage 2 - Kidney disease w/mildly decreased GFR	60-89 mL/min
Stage 3 - Moderately decreased GFR	30-59 mL/min
Stage 4 - Severely decreased GFR	15-29 mL/min
Stage 5 - Kidney Failure	14 mL/min or less

STATUS: COMP

REGD: 05/14/13-1813

ORDERED: PT and PTT, Fibrinogen, D-Dimer Quant

Test	Result	Flag	Reference	Situ
PT				
> Protime	20.5	H	9.4-11.6 sec	
> INR	REPEATED TO VERIFY 2.1		1.2 Ratio	
	*INR values, while recommended for monitoring all stages of oral anticoagulant therapy, may be less reliable during the initiation period of treatment.			
	INR THERAPEUTIC RANGE: Conventional Dose - 2.0 - 3.0 Intensive Dose - 2.5 - 3.5			
> PTT	35.9	H	20.3-30.4 sec	
	Although heparin therapy should be individualized, a range of 1.5 to 2.5 times the patient's baseline aPTT serves as a guideline.			
> Fibrinogen	Test not performed		202-445 mg/dL	
	UNABLE TO DETERMINE FIBRINOGEN LEVEL DUE TO ELEVATED D-DIMER RESULTS.			
> D-Dimer Quant	162.80	H	0.17-0.59 mg/L FEU	
	An elevated D-dimer result is associated with an increased risk for thromboembolism, DIC, or other coagulopathy. In addition, a normal value may be of use in ruling out pulmonary embolus and/or deep vein thrombosis. Correlation with clinical and radiographic features is suggested.

Exam CPT: 71010
Report# RAD 0514-0540
Requisition# 13-0088710

Chest one-view 1739 hours

History: Status post cardiac arrest, check central line placement.

Findings:

Right internal jugular central venous catheter tip overlies the expected cavoatrial junction.

ET tube tip is well above the carina.

NG tube tip courses below the GE junction and projects over the expected gastric fundus.

There is no focal lung consolidation, pleural effusion or pneumothorax.

Chest one view May 15, 2013

Clinical history: Cardiac arrest.

Comparison: Chest one view May 15, 2013 at 02:31 a.m..

Findings:

Endotracheal tube tip projects approximately 3.1 cm from the carina.
Nasogastric tube is
stable in position. Previous right internal jugular central venous catheter
is not
definitively visualized on this exam. A right upper extremity PICC
catheter tip projects
over the expected right atrium.

No new pulmonary or pleural abnormality detected.

The remainder of the examination is not significantly changed.

RE: Name: Jane, Dustin
 Date of Birth: 05/31/1966
 Social Security#: Unknown
 Date of Death: 5/15/2013

Attention: Records Division/Release of Information Dept.

Our forensic facility has been authorized to perform an autopsy on the above-referenced decedent for the purpose of determining the cause and manner of death. A copy of the Autopsy Authorization signed by the Justice of the Peace accompanies this fax for your records. In order to complete our investigation, we require medical records or information from your institution. The authority for this request is within the following statutes:

Health Insurance Portability and Accountability Act (HIPAA) of 1996 explicitly states that neither authorization by next of kin, nor a court order, is required to release private health information (PHI) to the Coroner, Medical Examiner and/or covered entities in line of his or her duties see 45 C.F.R. § 164.512(f)(1).

Researching a decedent's past medical history is the first step in conducting a post-mortem investigation. Not only deaths from apparent natural causes, but also homicides, suicides, and accident investigations as well. It is vital that any medical examiner office obtain the most accurate medical history possible. Once the decedent's PHI is in the medical examiner's case file, it too becomes protected by HIPAA laws, and is used only for the purposes of this investigation.

We are requesting the following records:

- | | |
|---|--|
| <input type="checkbox"/> EMS Notes | <input type="checkbox"/> Progress Notes |
| <input type="checkbox"/> ER Notes | <input type="checkbox"/> Operative Reports |
| <input type="checkbox"/> Admissions H&P | <input type="checkbox"/> Discharge Summary |
| <input type="checkbox"/> Laboratory Results | <input type="checkbox"/> X-ray Reports |
| <input type="checkbox"/> Toxicology results (Blood alcohol & Tox Screen) | |
| <input type="checkbox"/> Other: All medical records from last visit to prior 3 months to include all diagnosis, medications, labs and surgical reports. | |
